## Spoof stock - Overriding stock info for selected items

Last Modified on 29/09/2023 2:15 pm IST

If you want to override the WebStore Config option "Restrict purchasing to in-stock quantity only" for items that are listed in POS as having a quantity of "O", you need to add a PAM field that "spoofs" (that is, fakes) the stock level for such items.

## How to Enable

To do so, perform the following steps:

• In NSc PAM, select Attributes, then Add New Attribute.

8	Level and the second with the second									
F	ile	ltems	Option	s Profiles	Attr	ibutes	Tools	Help		_
🌗 Modify Filter 🛛 🕱 Remove Fi			1	WebSell PAM Attribute List		Visibility				
arch MinPurchaseAmount:					Add N	lew Attr	ibute			
				A		L				
	Iten	n Lookup	Code	Description		Attribute Visibility			nt Name	

• For Attribute Name, specify **SpoofWebStock**. For Type, select **Checkbox(true/false)**.

Add Attribute	
Attribute Name:	SpoofWebStock
Attribute Type:	Checkbox (true/false) 🗸 🗸
	OK Cancel

- Click OK. The newly added field is now displayed as a new column in PAM.
- Enter **True** in the SpoofWebStock column for each item that you want to show as in stock (even though it's not actually in stock).

Description	Department Name	Category Name	Webltem	SpoofWebStock
Watercolour paint 2	Paints	Watercolours	True	True
Watercolour Paint 1	Paints	Watercolours	True	True
Oil paint 1	Paints	Other	True	True
Brush set small	Brushes	Brush sets	True	True

• In NSc Sync Configuration, under Advanced, select Field Mappings and click on Item table.

• Scroll down, right-click the product\_stock field, then select Properties.

Field Mappings									
Sync can be configured to upload a wide variety of data. The following options allow you to modify what Sync uploads to your webstore. This configuration dialog should be used with care as it is for advanced users ONLY!									
<ul> <li>mi product_price</li> <li>mi product_price</li> <li>mi product_imag</li> <li>mi product_subo</li> <li>mi product_subo</li> <li>mi product_subo</li> <li>mi product_prace</li> </ul>	eb ec ge description 1 description 2 description 3 idname category	^							
synchronized.	Add Field > Edit Field Delete Field Refresh Import Revert Field	Cancel							
synchildfil260.	Properties Commands								

• For Field Source, specify the following:

## CASE WHEN SpoofWebStock = 1 THEN 10 ELSE quantity-quantitycommitted END

where 10 is the item quantity to be displayed on your WebStore.

Edit Field Mapping					
Field Properties					
Remote Field Name:	product_stock				
Field Source:	CASE WHEN SpoofWebStock = 1 THEN 10 ELSE quantity- quantitycommitted END				
Field Description:	No Description				
Functions 💌	Validate Cancel				

• Click all the relevant OKs, then re-synchronize your WebStore.

Your WebStore now displays the quantity 10 for the items with the PAM attribute SpoofWebStock set to true, for example:

## \$25.00
