

Google Maps

Last Modified on 29/09/2023 12:22 pm IST

You can use a Google Maps API key to display your brick-and-mortar store location on your webstore.

Using the Google Maps Platform

By using Google's API to add a map section to your webstore, you are agreeing to the [Google Maps Platform Terms of Service](#) .

Register a Google Maps API key

You can register a Google Maps API key to show your map on your webstore.

Steps:

1. Visit the [Google Maps Platform](#)  page and click **Get started**.
2. Select the **Maps**, **Routes**, and **Places** products to get the APIs that are needed to work with the free themes Map section.
3. Click **Continue**.
4. Either create a new name or select an existing project.
5. After agreeing to the terms of service, click **Next**.
6. Create a billing account with the Google Maps Platform. A billing account is a requirement in the new Google Maps Platform.
7. After enabling the Google Maps Platform, copy your new Google Maps API key to your clipboard.

Enabling Google Maps on your WebStore

Now you need to enable Google Maps on your webstore.

Steps:

1. When logged in to your WebStore Manager click **Settings > All Config Options**.
2. Search for '**Google Maps Integration**'.
3. Check the box marked '**Enable Google Maps Integration**'.
4. Enter your copied API key into the blank box.
5. Click **Save**.

Adding a map to your Contact Us page

You can now add a map automatically to your Contact Us page.

Steps:

1. To add the map to your **Contact Us** page, under **Management**, click **Page Content**.
 2. On the **Tabbed Pages** page, select **Contact Us**.
 3. On the **Editing Contact Us** page, Click **HTML**.
 4. Copy and paste the example code provided by Google to insert the map.
 5. Click **Update**, then click **Save**.
 6. Click **make this change live**.
 7. Click **View WebStore**, then select the **Contact Us** page on your WebStore. The Google map of your store location is displayed.
