

# Populate carousel from a field

Last Modified on 10/03/2021 9:46 am GMT

## Populate carousels from a field

---

In this feature, you can:

- Populate carousels from a field

To populate carousels manually, do the following:

1. Login to your WebStore Manager.
2. Go to **Design & Content > Carousel Builder**.
3. Select or create a new carousel.
4. Select **populated by field**.

### Populating carousels by field

- This carousel only works on product pages.
- Enter product codes (item lookup codes) into a custom text field.
- These items will then display on the carousel.
