

# Importing bulk product images

Last Modified on 27/07/2021 4:37 pm IST

## Importing bulk product images

In this feature, you can:

- Import product images in bulk

To import product images in bulk, do the following:

1. Login to your WebStore Manager.
2. Go to **Products > All Products**.
3. Click **Import Product Image File**.

### Importing product images

- Upload your images in a Zip archive file.

Note: The acceptable image file format should be JPG or PNG. The max size of any image file is 2 MB.

- Images should be named after the SKU code of the product, this will help up identify where the images should go.
- E.g., If a product's SKU code is 56789 then the image should be named 56789.jpg.

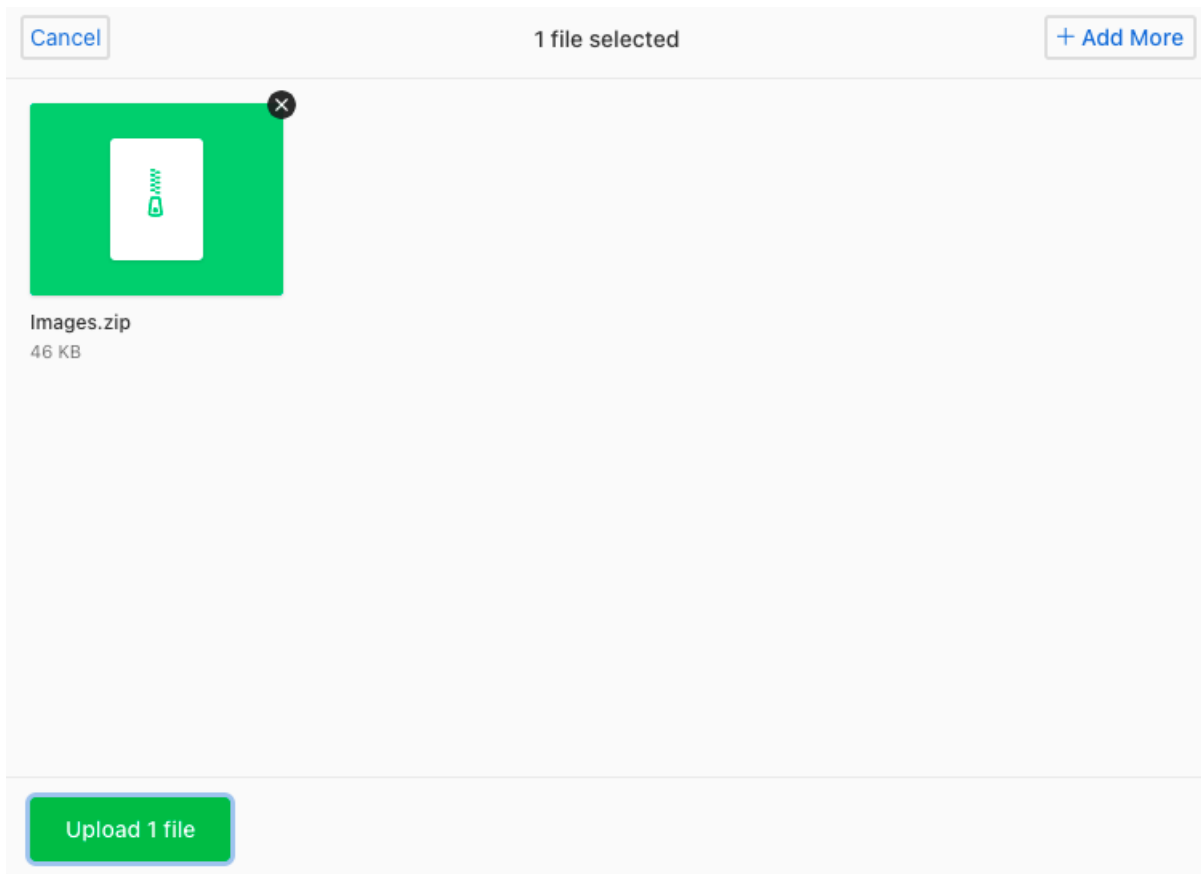

67676.jpg

45671.jpg

Note: You can only add one image per product.

- Click **Import Zip File**.
- Select your Zip file.

- Depending on the number of images you are adding, this might take a while.
- An upload summary will confirm the images were received.

## Upload Summary

---

2 product images received, 2 items were found from your store.

Item	SKU	Image
Dog Bone	45671	
Dog bowl	67676	

Close

- Images will not be set as the primary image, you will have to manually set them yourself.

To learn more about primary images, visit: [Adding images to a product.](#)
