

# Editing blog panels

Last Modified on 29/09/2023 12:45 pm IST

In this feature, you can:

- Learn to edit and modify the blog archive panel

To edit and modify the blog landing page, do the following:

1. Login to your WebStore Manager.
2. Go to **Design & Content > Edit Templates.**
3. Scroll to the **Blog** header.
4. Select the **blog archive panel.**

Warning: If you are not comfortable with editing HTML and do not have experience with web scripting languages, it is advisable to seek WebSell's assistance with changes to these templates.

## The blog archive panel

- This panel lists the blog articles by date they were published.
- Each article is a link to an article page.

## Default behaviour

- The default behaviour of the panel is to display the years the blog has been in existence.
- This is further broken down into months on which articles were written.
- Each month then has a list of articles written that month.
- All articles are hidden except for those in the last year and month.
- The visibility of these is toggle by clicking on a month or year.
- This toggling relies on the class names given to the years and months.
- To stop this behaviour and have everything display, simply remove the class names.

## Loops in NitroScript

- NitroScript will allow you to nest certain arrays of information. This page has three arrays of information available on it:
  - `blogArchiveYear` : list of years in which articles have been written;
  - `blogArchiveMonth` : list of months in which articles have been written;
  - `blogArchiveArticle` : data on articles. Each article knows the year and month it was written in and can therefore be used to check if it should be present in any loop over `blogArchiveMonth` and `blogArchiveYear`;

- They can be nested in each other in this order.
- There is no point trying to loop over `blogArchiveYears` inside `blogArchiveArticle`.

To edit and modify the blog landing page, do the following:

1. Login to your WebStore Manager.
2. Go to **Design & Content > Edit Templates.**
3. Scroll to the **Blog** header.
4. Select the **Blog most viewed list.**

Warning: If you are not comfortable with editing HTML and do not have experience with web scripting languages, it is advisable to seek WebSell's assistance with changes to these templates.

## The blog most viewed panel

- This panel lists out the most visited blog articles on your store.
- Every time someone visits a blog article a counter is incremented on the platform.
- This allows us to order the articles by page views.
- The articles are listed from the most viewed article down to the least viewed article.

## Number of articles displayed

- The default behaviour is to display 8 items in this panel.
  - If you want this to be different please open a ticket with the support team quoting this article.
