Introduction to accessories

Last Modified on 29/09/2023 2:10 pm IST

To view all products, do the following:

1. Login to your WebStore Manager.
2. Go to **Products > Product Details.**
3. Scroll to **Accessories.**

Introduction to accessories

Add and show accessories for a product in a separate tab on the product page:

- Shoppers can find and buy accessories for the product they are interested in, without leaving the product page.

- The accessories are organized into departments and categories.

- Showcased accessories are shown automatically when you first view the Accessories tab, which enables you to draw the shopper's attention to specific products.

- They can go to the accessory's page by clicking on the accessory name, or they can buy the accessory without being redirected by clicking **Add to Cart.**
