# **PayPal Checkout integration**

Last Modified on 20/03/2025 3:03 pm GMT

PayPal Checkout provides a seamless payment experience by enabling customers to complete transactions in a pop-up window, eliminating the need for redirection to PayPal's website. This ensures a faster and more convenient checkout process for your customers.

You can read more about PayPal checkout here:

PayPal Checkout Overview - https://developer.paypal.com/studio/checkout/standard How PayPal Checkout Works - https://developer.paypal.com/studio/checkout/standard/getstarted#howpp-checkout-works

## **Enabling PayPal Checkout on your WebStore**

### Steps:

1. To generate credentials for the PayPal Checkout integration, log into your PayPal Business account.

2. Go to the Developer Dashboard: https://developer.paypal.com/dashboard/

3. Click your user in the top right, and in the menu, click **Dashboard**.

PayPal D	Developer Dash	board Q Search	Docs	APIs & SDKs	Tools	Video Library	Help	Business Dashboard		
P	Home	Apps & Credentials	Testing Tools	Event Logs				Sandbox	Dashboard My Account	
eckout with	Fastlane. Get S	Started							Log Out	

4. Click **Apps & Credentials** from the menu on top, or to the left of the page.

5. You should see a toggle between Sandbox and Live. Make sure you click Live.

6. Under a table for **REST API Apps**, click the **Create App** button.

P	Home	Apps & Credentials	Testing Tools	Event Logs		Sandbox 💽	) Live
ackout with Fastlane. Get Started							
<b>AP</b> REST	<b>Crec</b>	dentials				Create	App
App n	ame	Client I	)	Secret		Created date	٥

7. Enter a name for your **App**.

8. Pick **Merchant** as an **App Type**. If there's a dropdown for **Region**, you should be able to keep **Region unselected**.

Create App

s a reminder, all apps created une nould be related to your business usiness it conducts.	der your account and the type of
clicking the button below, you a	gree to PayPal

9. Once that is complete, it should now display a **Client ID** and a **Secret Key**.

10. Copy these two values.

11. In WebStore Manager, under Orders > Payment Processor Set-up, select PayPal Checkout from the dropdown list.

- 12. Click the **Configure** button.
- 13. Check the Enable PayPal Checkout box.
- 14. Paste the App Client ID and App Secret into the integration.

#### **Configure PayPal Checkout**

PayPal Checkout Configuration

	Enable PayPal Checkout	
App Client Id:	AZg8FFhZiCzwJFlFNNjxJ6TORqC33IXFZu:	
App Secret:	EJrfvuE9weo7zxcr1Szb7ORVSwEXEtnXhmF	
(Test Mode/Leave Blank) Override Customer's IP-derived Country for Pay Later:		

15. Select a Default Tender and Currency, and save changes.

Tender Configuration			
	Select the tender(s) that should be used for this plug-in.		
Default Tenderi	Web Order 🗸		
Currency Configuration			
	Match up your active WebStore currencies with the supported payment gateway currencies. Not all payment gateways support all currencies.		
RMS Currency	Gateway Currency		
US Dollar:	US Dollar 🗸		
Euro	* Disabled *		
UK Pound Sterling:	* Disabled *		
	Save Cancel		

Note, if you previously used another PayPal integration, it needs to be disabled first.

It is recommended that you run a test transaction after enabling the new payment gateway and process your order at the POS.

### **Enabling PayPal Express Checkout**

For customers using Next-Gen templates, the new PayPal Checkout includes an option to enable Express

Checkout, allowing it to appear on the first step of the checkout process.

### Steps:

1. In WebStore Manager, under **Orders > Payment Processor Set-up**, select **PayPal Checkout** from the dropdown list.

12. Enable the **(Only for Next-Gen stores) Enable one-click express checkout for applicable stores** option.

13. Save changes.
