Product page options

Product card size:

Minimum size of product card (on listing pages)

250

px

Change product tabs to accordion:

Toggles between tabs and accordion display of product details.

Enable full width product page:

Displays product details under product picture and description, instead of on the side of the picture.

Fit product images into product card box:

Scales down images to always display them fully in the product card box.

Product Card Size

This setting controls the **minimum size of each product card** on your department or category pages. Product cards include elements like the product image, name, price, and labels.

By default the size of each product card is **220px**. Increasing the size can make your product images appear larger, while decreasing it allows more products to fit in a row.

Change Product Tabs to Accordion

This option lets you choose how product details (such as Description, Content Tabs, and Reviews) are displayed on the product page.

When enabled, the traditional **tab layout** is replaced with an **accordion layout**, where each section is collapsible. This format is especially helpful for mobile users because it saves space and makes the page easier to scroll.

Description

Reviews

Details

This premium oil paint is crafted with high concentrations of finely milled pigments, delivering unmatched vibrancy and exceptional color purity. Its luxurious, creamy consistency allows for effortless application, smooth blending, and precise control. Formulated with high-grade oils, it offers excellent lightfastness and long-lasting durability, ensuring your artwork retains its brilliance over time. Each color is carefully refined to provide consistent performance and rich, nuanced tones that elevate any painting style. Trusted by experienced artists and ideal for those seeking top-tier materials, this brand sets a new standard in professional-quality oil paint.

Enable Full-Width Product Page

When this option is enabled, the product details (such as Description, Content Tabs, and Reviews) are shown **below** the product image instead of next to it. This layout is ideal if you want a cleaner look, or more space for longer descriptions or images in the content tabs.

Fit Product Images Into Product Card Box

This option ensures that all product images are **scaled down to fit fully** inside the product card box. If your images vary in shape or size, enabling this feature helps keep your product grid tidy and

prevents images from being cut off or misaligned.

See an example below – Without this option, smaller or differently-shaped product images may be cropped on the sides, which can look unprofessional.

Acrylic Ink

\$15.00-\$30.00

Select Options

When this option is enabled, the entire image will automatically fit inside the product card box, creating a **clean and consistent appearance** across your store.
