

# Header Options

Last Modified on 02/12/2025 1:50 pm GMT

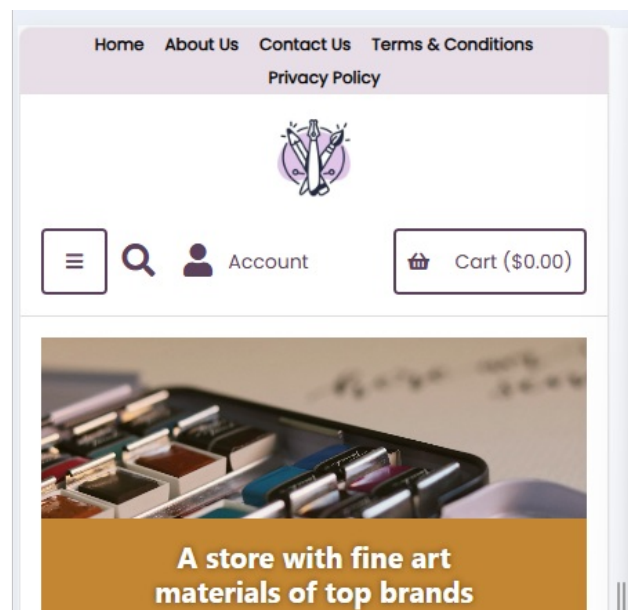

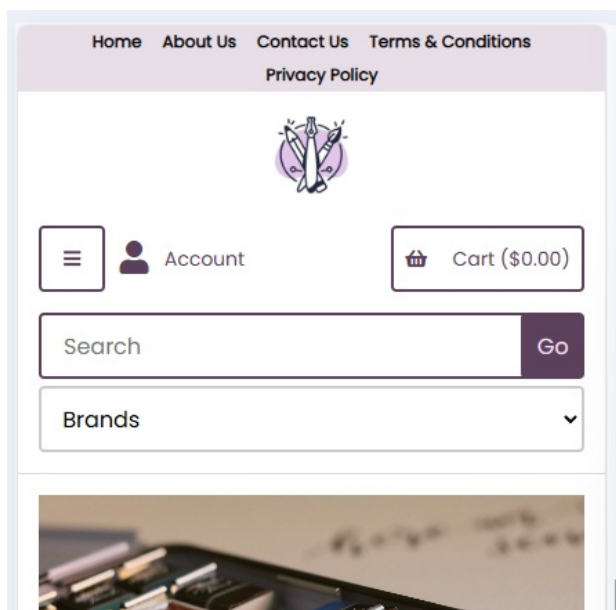

## Header options

- Enable full width header:**  
Changes header's content to full width instead of container width.
- Hide search on mobile:**  
Displays  icon in the header instead of a search box.
- Disable sticky navigation:**  
Disables always visible header (logo + menu).

**Enable full width header** – When enabled, the header's content expands to the full width of the screen

**Hide search on mobile** – By default, the search box appears on mobile the same way it does on desktop. When you enable this option, the full search box is replaced with a simple magnifying glass icon on mobile devices. Tapping the icon opens the search box.

**Disable sticky navigation** - By default, this option is **disabled**, meaning the header does *not* stay visible when you scroll down the page. If you enable this option, the header becomes **sticky**, so it remains visible at the top of the screen on all pages while you scroll. See examples below:
