

# Next Gen Carousel Builder

Last Modified on 20/11/2025 9:40 pm GMT

Carousels on Next Gen templates come with a new set of settings, allowing you faster, easier and better customization.

Here is the new list of settings, and we will explain them in details below:

Option	Default	Value
Title	Carousel Title	<input type="text" value="Notebooks and stuff"/>
Sub Title	Carousel Subtitle	<input type="text" value="some of our favourites"/>
Show Title	false	<input checked="" type="checkbox"/>
Display Type	slider	<input type="text" value="Grid"/> ▼
N Max Carousel Length	50	<input type="text" value="10"/>
S Sort Field	product_priority, product_name	<input type="text" value="product_priority, produ"/>
S Sort Order Direction		<input type="text"/>
B Display Matrix Items Grouped	true	<input checked="" type="checkbox"/>
Auto Play	false	<input checked="" type="checkbox"/>
Auto Play Speed	5000	<input type="text" value="5000"/>
Speed	800	<input type="text" value="700"/>
Stop On Hover	false	<input checked="" type="checkbox"/>
Loop	false	<input type="checkbox"/>
Lazy Load Images	false	<input checked="" type="checkbox"/>
Items	5	<input type="text" value="4"/>
Resp		<input type="text" value="0:1,400:2,768:3,1300:4"/>
Pagination	true	<input checked="" type="checkbox"/>
Slide By	page	<input type="text" value="page"/>
Navigation	false	<input checked="" type="checkbox"/>
Ratio		<input type="text" value="1-1"/>
Style	default	<input type="text" value="Custom"/> ▼
Class	default	<input type="text" value="def"/>

Title:

**In product carousels:** always displayed above the products list. If a carousel is based on a rule, the name will also be a link to the filtered search results containing all items matching your criteria.

**In image carousels:** not displayed by default (but can be with a new setting)

## ☐ Subtitle:

If exists, it will display under the Carousel Title.

## ☐ Show title:

(setting applies only to Image carousels)

If enabled, it will display the Carousel Title above the images.

## ☐ Display type:

Allows for switching the display of the carousel.

Default: Slider

Available options: Slider, Grid, Email

**Slider:** renders as a carousel (typical behavior)

**Grid:** renders as a "grid" — *not a slider*, with items dropping into next line if there is more of them

**Email:** renders an email-safe, table-based markup, ready to be placed in your WebStore email template

## Ratio:

(setting applies only to image carousels)

Sets a uniform size for all the pictures within the carousel.

### Accepted values:

- **1-1** means square  
Universal and easy to maintain
- **2-1** means 2 times wider than taller (for example 1000x500)  
Great for container-wide promotional banners
- **3-1** means 3 times wider than taller (for example 1500x500)  
Great for container-wide promotional banners
- **4-1** means 4 times wider than taller (for example 2000x500)  
Great for full-screen-wide promotional banners
- **2-3** means 1.5 times taller than wider (for example 200x300)  
Great for book covers and portrait banners

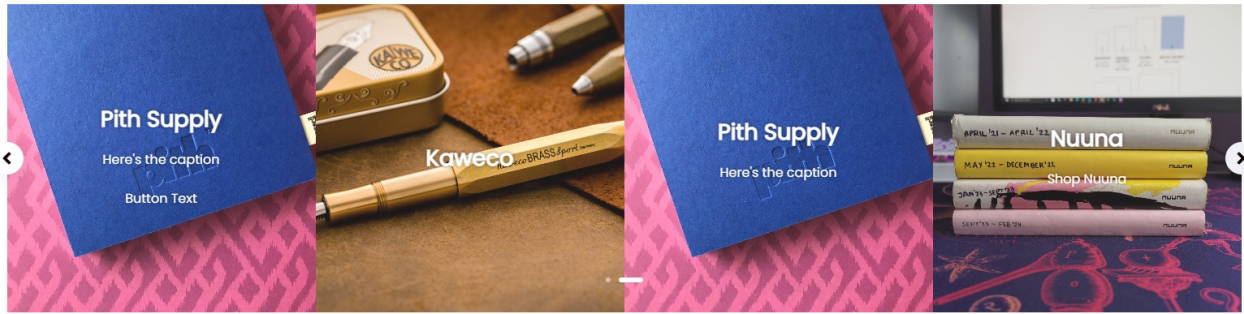

## □ Style:

(setting applies only to image carousels)

Try different styles for your carousels and captions.

**Default:** text on the image, centered

Shop our Favourites

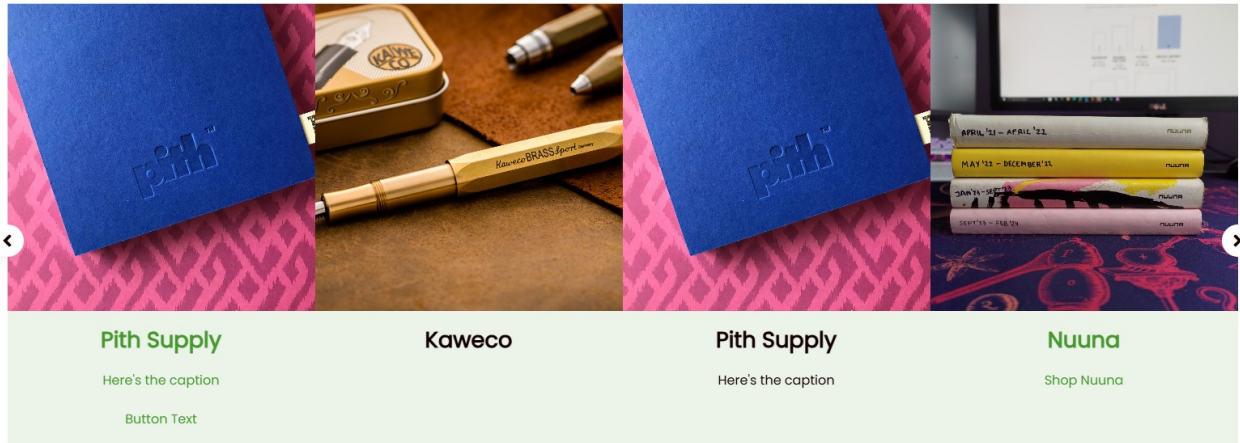

**Circle:** text on the image, centered, but the image cropped to a circle

Shop our Favourites

**Boxes:** caption under the image

## Shop our Favourites

**Showcase:** text on the left side, image on the right
