

Multiple Shipping Addresses

Last Modified on 19/12/2025 1:46 pm GMT

The WebSell webstore supports **multiple shipping addresses**, which are automatically available to customers at checkout. These addresses are synchronized directly from Microsoft Dynamics 365 Business Central, ensuring that all customer shipping locations are up to date.

To enable this feature, ensure that the customer's additional addresses are set up in Business Central; they will then appear automatically in the shipping address selection during checkout without further configuration on the webstore.

Shipping Address

Kolobrzeska 10, Szczecin, none, PL

Mlynska 12, Poznan, none, PL

At checkout, customers can **select one of the pre-populated addresses** or **add a new shipping address** directly during the checkout process.
